

## **Sonasoftware<sup>®</sup> SMB Email Archiving Solutions for the Virtual Domain**

Sonasoftware delivers a new generation of standards compliant and flexible email archiving solutions for small to medium sized businesses (SMBs). Sonasoftware's SonaVault is a stand-alone, software-based, powerful and comprehensive email archiving solution with the ability to capitalize on a virtualized environment for Microsoft\* Exchange\* Server 2000, 2003, 2007 and 2010. It enables organizations to archive, search and retrieve emails to achieve regulatory compliance and operational excellence.

SonaVault provides fully compliant Electronic Data Discovery (EDD) capabilities by enabling seamless access to messages using standard search policies such as keywords, enabling administrators, auditors and end-users quick retrieval of any email stored in Archive with flexible export options. Content Identification Policy provides an additional level of compliance by providing the ability to identify and alert any e-mails that violate standards or compliance policies. Case Management, an integral feature within SonaVault, automates the litigation hold process by ensuring important emails are not deleted and can be kept until the legal action has been resolved.

SonaVault for Email Archiving delivers a fully integrated portfolio of features and tools such as stubbing and single-instance store to ease a data-encumbered Exchange server. Stubbing reduces the size of the Exchange Server by 80% which in turn minimizes backup time and speeds up the restore process. The result is a more efficient, higher performance storage management solution. Additionally, SonaVault uses built-in SQL Server technology to encrypt and archive all emails sent or received through an Exchange Server.

As a member of the Intel<sup>®</sup> Enabled Server Acceleration Alliance (Intel<sup>®</sup> ESAA), Sonasoftware and Intel engineers have collaborated on several solution configuration recipes for Sonasoftware software on Intel<sup>®</sup> Server Products. Available Sonasoftware solution recipes from Intel<sup>®</sup> ESAA include:

- Sonasoftware\* SonaConsole\* on Microsoft\* Windows Server\* 2003 x64
- Sonasoftware\* SonaConsole\* on Microsoft\* Windows Server\* 2008 x32
- Sonasoftware\* SonaVault\* on Microsoft\* Windows Server\* 2003
- Sonasoftware\* SonaVault\* on Microsoft\* Windows Server\* 2008
- Sonasoftware\* SonaSafe\* on Microsoft\* Windows Server\* 2003 x64

Sonasoftware's SMB business continuity software leverages Intel<sup>®</sup> architecture and provides an ideal bundling opportunity for resellers. Sonasoftware is offering a FREE 30 day trial of their SonaVault Email Archiving software for all Intel<sup>®</sup> ESAA reseller partners. Contact Sonasoftware at [www.sonasoftware.com](http://www.sonasoftware.com), call +1 408-323-2420, or click on <http://www.sonasoftware.com/Resources/Downloads.aspx> and enter Promotional Code **BINESPPS**. If you are interested in possible bundling opportunities with your hardware to enhance your product offering, or just interested in learning more about Sonasoftware and our other benefits exclusive to Intel<sup>®</sup> ESAA partners, contact us today.
