

## Intel® Enabled Server Acceleration Alliance

# Safeguard your success with pre-validated server solutions.

Looking for reliable, affordable, high-quality solutions to complex IT requirements? Your local reseller now offers combinations of hardware and software that are pre-validated and optimized to work together by the world's leading equipment and software makers. By delivering solutions provided by the Intel® Enabled Server Acceleration Alliance (Intel® ESAA), resellers help you meet IT challenges with less effort and expense. And you can be confident in the choice of industry-leading software and the proven reliability of Intel® Server Products.

Get peace of mind from reliable technology solutions  
with components that work together seamlessly.

Ask your reseller about validated server solutions  
from Intel® ESAA.

### Reap the benefits of world-class design expertise

The Intel ESAA program enables your local reseller to provide high-quality, pre-validated Intel-based server solutions so you can focus on business operations, not IT problems:

- **Quality.** New Intel technologies and processors improve energy efficiency and performance – to make servers easier and cheaper to run.
- **Flexibility.** Intel® Server Products built on the new Intel® Xeon® Processor 5500 Series offer support for demanding business requirements – now and in the future.
- **Support.** Save money and optimize operational efficiency with pre-validated solutions that work right the first time – and rely on expert advice from your reseller to keep things running smoothly.

### Take the complexity out of IT solutions

Intel ESAA gives your reseller access to hundreds of pre-validated solutions for Intel Server Products. Each includes hardware and software components that have been carefully selected and tested to work together optimally by the engineering teams that built them. The result? Your value-added reseller can provide a wide range of solutions to help you meet strategic and operational requirements with confidence. And as your business needs grow and change, you can continue to rely on expert advice from your reseller to expand your IT infrastructure.

“What I need is a stable, secure, and reliable system. When I need to purchase, I require that the product is strictly certified. We have full trust in [Intel® ESAA member] Inspur...because of its pre-testing.”

Xiaojing Zhao, Director, Information Centre,  
Shandong Province Jining Local Taxation Bureau

## Rest easy as you take your business to the next level.

You want to solve business needs efficiently using solid IT solutions. You want the latest technologies, without deployment or troubleshooting headaches. You want them to just work. Intel-based server solutions can help make all that happen.

### Avoid the unexpected

Finding ways to control costs and risk as you implement new technologies is an ongoing challenge for IT departments. Intel ESAA helps system integrators ensure that when new hardware and software components arrive at your site, the pieces fit together the way you expect. That avoids project delays and costly integration efforts, helping to complete your project on time and on budget.

And once systems are up and running, you can have confidence that they will continue to run smoothly. That makes managing your environment easier, saves on total cost of ownership, and avoids outages that would disrupt business.

### Get smooth results, today and tomorrow

Choose server solutions from your local reseller that have been pre-validated through the Intel ESAA program. The integration and optimization work has already been done before the equipment arrives, streamlining your implementation. As a worldwide technology community, Intel ESAA also provides a product support network that draws on the expertise of world-class hardware and software vendors, so the smooth sailing continues throughout the life cycle of your solution.

## RELIABLE SOLUTIONS FROM INTEL AND ORACLE

Your reseller offers solutions powered by Intel® Server Products that cover a broad range of Oracle applications, such as:

- Oracle Application Server\* 10.1.3
- Oracle Real User Experience Insight\*
- Oracle 10G\* R2 Database — Microsoft Windows\*
