### Intel® ESAA Partner News:

#### Sonasoftware Introduces Email Archiving Solution: SonaSafe

Email has been growing at the rate of 40% every year. Meanwhile Microsoft Exchange Server is not only being used as an email server, it is also being used as document repository and management system. Sonasoftware's SonaSafe solution for email archiving is designed to meet regulatory compliance and eDiscovery needs of organizations. SonaSafe captures all incoming, outgoing and internal emails and store them in archive databases as a Single Instance Store (SIS). Message contents, including attachments, are saved in the archive database while leaving an empty shell of the message, namely "stub" in the body of the email. This approach can reduce the size of the Exchange server by up to 90%. Intel® ESAA recipes for SonaSoft installations on Windows Server 2003 are available for Intel® Server Boards S5000PAL, S5000PSL, S5000VSA, and S3000AH. To learn more, visit: <http://www.sonasoftware.com/solutions/emailarchiving.asp>

#### Now Available: IBM\* Lotus Domino\* 8.0.x Installation Recipe on Red Hat\* Enterprise Linux\* 5.0

IBM\* Lotus Domino\* software and its client software options deliver a reliable, security-rich messaging and collaboration environment that helps companies enhance the productivity of people, streamline business processes and improve overall business responsiveness. Intel® ESAA recipes for Lotus Domino installations on RHEL 5.0 are available for Intel® Server Boards S5000PAL and

S500PSL and the Intel® Modular Server. To learn more, visit:  
<http://www.lotusonredhat.com/>

#### **Astaro Announces Certification on Intel® Modular Server Platform**

Complete your "Business in a Box" strategy with award-winning network security from Astaro. Now certified on the Intel Modular Server platform, the Astaro Security Gateway software appliance includes a wide range of capabilities, including Firewall Protection, SSL VPN, Intrusion Prevention, Content (URL) Filtering, Email Filtering, and IM/P2P Traffic Management. To download the installation guide, visit <http://www.esaa-members.com/index.php/recipes/recipeSummary/615>

#### **Selling E-mail Archiving Solutions Has Never Been Easier: Big Announcements for Intel ESAA Resellers from NorthSeas - Earn big margins with the NorthSeas Free Edition for Small Business**

Organizations with 50-users or less can now install and run a fully-functional version of NorthSeas e-mail archiving software indefinitely, at no charge. So why should Intel resellers care about free software? Resellers can package it and price it as they wish (e.g. hardware, support, and maintenance bundled in). Maintenance plans are available from NorthSeas. Because the license is free, reseller margin are high!

##### **- NorthSeas on VMWare 6.0**

VMWare has become an extremely popular computing platform for many types of organizations including small businesses. Customers can now install NorthSeas e-mail archiving software along with other applications on a common VMWare base. Using VMWare, resellers can bundle NorthSeas software, together with other applications, on the same server. Hosted e-mail archiving providers can provide domain-level e-mail archiving by assigning a separate NorthSeas virtual machine to each customer domain.

##### **- NorthSeas Pay as You Go**

Need to conserve capital? Customers and partners can now obtain NorthSeas software for a low monthly subscription rate. Resellers are free to set a monthly fee suited to their specific marketplace. Monthly payments are charged automatically against a credit-card. Resellers can take advantage of Pay as You Go when selling the solution to customers on the same basis.

To download the NorthSeas\* Guard E/N\* e-mail archiving appliance recipe for the Intel® Server System SR1530AH or SR1530AHLX, visit <http://www.esaa-members.com/index.php/recipes/recipeSummary/555>.

For pricing and other information, please send an e-mail to [sales@NorthSeasAMT.com](mailto:sales@NorthSeasAMT.com) or call 613-591-1045 (Canada).

#### **Now Available: Parallels Virtuozzo Containers 4.0 for Windows Server 2003**

Parallels\* Virtuozzo Containers\* on Windows Server 2003\* enables organizations to maximize server resources through a unique virtualization technology as well as manage IT infrastructure easily with an advanced set of administration tools. Recipes are now available for Virtuozzo 4.0 installations on Windows Server 2003 and Intel® Server Boards S500PAL, S500PSL, and S5400SF, Intel® Server System S7000FC4UR and the Intel® Modular Server. For more information, visit: <http://www.parallels.com/products/virtuozzo/new/>

#### **Novell Delivers Desktop-to-Server Software Suite for Small Businesses**

A Linux-based desktop-to-server solution tailored to meet the needs of small businesses, the Novell Open Workgroup Suite Small Business Edition combines the flexibility and cost efficiency of open source software with the support of an established enterprise software vendor. Based on SUSE Linux Enterprise, it includes Novell GroupWise for e-mail, task management and calendaring; Novell Open Enterprise Server for storage, print and management services; SUSE Linux Enterprise Server for running applications; SUSE Linux Enterprise Desktop from

Novell for complete desktop productivity; and the Novell edition of the popular office productivity suite OpenOffice.org for Windows\* and Linux\*. To accommodate growing businesses, the suite features support for up to five servers and 200 users. Recipes for SUSE\* Linux Enterprise Server\* 10 are available on Intel® Server Boards S5000PAL, S5000PSL, S5400SF, X38ML, and S3200SH and Intel® Server System S7000FC4UR. For more information, visit <http://www.novell.com/smallbiz>.

### **UniCluster 4.1 Now With Oracle Unbreakable Linux: The Industry Standard in Simplified Cluster Management**

Free open source download...fast and easy install process...broad compatibility...single support path for all components...there's no easier way to get a cluster up and running! UniCluster 4.1, the leading software stack for integrated cluster scheduling and management, now offers Oracle Unbreakable Linux support (along with standard RHEL and CentOS compatibility). This comprehensive stack makes it easier than ever to deploy, configure and manage Intel® Cluster Ready certified clusters. It's the right solution for companies who need to minimize TCO while maintaining the performance they need to compete - and all with a single line of support for all packaged components. Find out more at <http://www.univaud.com/hpc/products/unicluster/> - or download the product at <http://www.grid.org/downloads>.
