Come Visit Intel ESAA at Parallels Summit 2009

We invite you to take advantage of this unique opportunity to learn about Cloud Computing and network with some of the world's largest hosting and service providers, telecommunications providers and industry giants. The Parallels Summit 2009 will have an over-arching theme on Cloud Computing and will include sessions on Software-as-a-Service (SaaS), Automation, Virtualization and other important topics. Business leaders and other experts will be on hand to give you strategic insights on thriving in these challenging times. Featured speakers include Dylan Larson, Director of Platform Technology Initiatives for Intel. Come join us February 2-4th in Las Vegas for this important and free industry event: <http://www.parallels.com/summit/>

Want to Be the Star of a Video Case Study?

Would you like to experience "on-demand computing in a box" by winning an Intel® Modular Server loaded with VMotion and Distributed Resource Scheduler (DRS) software from VMware? Would you like to be featured in an all-expense-paid video case study showcasing your company and a recent customer win? For a chance to win both prizes, sell Intel's Modular Server, built on Multi-Flex Technology with VMware's Virtual Infrastructure product, into a small to mid-market size company between December 10th, 2008 and March 31st, 2009 and let us know about it! For a chance to win both prizes, visit www.vmware.com/go/videopromo and complete the simple on-line form. As an added bonus, the first 50 submissions received on February 16th, 2009 after 12:00 AM PST will automatically receive a free workstation license from VMware (approximate value \$189 USD).

Intel® ESAA Partner News:

Cluster Checker Kit Now Available for UniCluster 4.1

Now businesses can easily verify the quality, interoperability, and performance of their HPC clusters. Univa UD now offers Intel Cluster Checker available as a Pro Pack for UniCluster 4.1, the leading software stack for integrated cluster scheduling and management. The ICR Pro Pack includes software that proofs your cluster installation against Intel's standards for cluster certification – ensuring the quality, interoperability, and performance of your cluster. It's the best and most cost-effective way to get a production HPC cluster up and running. Find out more at <http://www.univaud.com/hpc/products/unicluster/>.

Citrix* Access Essentials* 3.0 for Microsoft* Windows Server 2008* Recipes Now Available!

Citrix Systems, Inc. announces the availability of five new recipes for their application virtualization product: Citrix Access Essentials™ 3.0. ESAA resellers may now provide their small to mid-size customers with the easiest, most cost-effective way to remotely access corporate Windows programs conveniently and securely over the Web. Citrix Access Essentials is a turnkey solution addressing the local and remote access needs of small and mid-size organizations. Seamlessly integrated with Essential

Business Server, Access Essentials centralizes application management in the EBS console to provide quick and easy administration, providing the easiest and most flexible way to deliver applications to remote users. For more information on Citrix Access Essentials, visit www.citrix.com/cae.

Recipe Now Available: Oracle Real User Experience Insight with Net Optics Tap

Net Optics has teamed with Intel and Oracle to deliver a unique server solution for Oracle Real User Experience Insight (RUEI). Customers worldwide can take advantage of these pre-validated and tested reference hardware configurations to increase agility, accelerate return on investment, and reduce deployment risk for their Web, SOA, and AJAX based business applications. Oracle RUEI uses state-of-the-art network protocol analysis technology to identify and resolve user experience issues and revenue problems in Web-based business applications—before business and users are impacted. Oracle-tested reference hardware configurations with Net Optics Taps and Intel servers make it easy for customers to roll out solutions for proof-of-concept and production deployments. For more information, visit <http://www.netoptics.com/pdf/OracleSolution.pdf>.

Red Hat Enterprise Linux 5.3 Now Available

On January 20 Red Hat announced the global availability of Red Hat Enterprise Linux 5.3. The latest version of Red Hat Enterprise Linux 5.3 includes significantly increased virtualization scalability, new hardware platform support and expanded software RAID technologies. Customers with a Red Hat Enterprise Linux subscription will receive the Red Hat Enterprise Linux 5.3 update, which is available for immediate download from Red Hat Network. The primary new features of Red Hat Enterprise Linux 5.3 include support for Intel Core i7 (Nehalem) processors and increased scalability of virtualized x86-64 environments, including the industry-leading ability to support virtual servers with up to 32 virtual CPUs and 80GB of memory. To learn more about Red Hat Enterprise Linux 5.3, visit www.redhat.com or e-mail intel-sales@redhat.com.
